PROJECTS

Nifty Indices Data Set Analysis (09/2021 – 12/2021)

Team Size: 1

Main objective was to analyze the data and predict future trends for NIFTY50.

This Project Helped to take better investment decisions for future. Helped to predict the future of Nifty Index. Helped to identify factors affecting the share market based on the data that is received every quarter.

Recruiting Application using Salesforce (3/2022 – 6/2022)

Team Size: 1

The project Recruiting App Enables a Well-Defined recruiting process to manage and track Process Job Openings, applicants/job applications, candidates and send Automated emails, it extends functionality of Salesforce Platform. It consists of Tabs like Home, Position, Job Posting and Side, Candidate, Job Application, Interview, Review. These tabs are used to store record in the fields. In this app we used relationship to link two objects.
